

RISKAUDIT IPSN/GRS International (GEIE)

In 1992, IRSN (at that time IPSN) and GRS created „RISKAUDIT IPSN/GRS International (GEIE)“, located in Fontenay-aux-Roses.

> Primary Objectives

- To develop the common activities (studies, research, expertise) of GRS and IRSN on the field of protection of man and environment against technological nuclear and non-nuclear risks
- To identify the potential needs of public or private customers
- To offer – as response of these needs – the joint technical capacities of IRSN and GRS and to negotiate respective contracts
- To manage these contracts and to implement the corresponding projects together with the technical capacities of IRSN and GRS and also of other Technical Safety Organisations (TSOs)

> Major Contractual Activities

- Technical assistance to Safety Authorities and TSOs of Central and Eastern European countries
- Transfer of Western regulatory methodology and tools
- Support to safety authorities in the assessment of Tacis-financed On-Site-Assistance projects for safety upgrading
- Harmonisation of safety approaches through co-operation of TSOs within the EU and between EU TSOs and TSOs of Central and Eastern European countries

> Major Customers

European Commission
European Bank for Reconstruction and Development
Governmental Bodies of EU accession states
Others (e.g. French and US organisations)
